

# PAGE 1 - TEXT EDITING

Fonts, sizes, colours, alignment, small text, overlapping runs

## Large heading text 24pt

### Subheading in navy 18pt

Times Roman body text at twelve point for serif substitution testing.

Courier monospace 11pt - column alignment 12345

**Bold red text for style-change testing**

*Italic green text for style-change testing*

***Bold italic serif, purple***

TINY 6pt text - should trigger "text too small to edit, please zoom in"

Small grey 8pt caption text for edge-case measurement

REPLACE-ME-TOKEN appears here and twice more for find & replace tests.

Second REPLACE-ME-TOKEN on its own line.

Right-aligned text run

Centre-aligned text run

Accented + symbols: aeiou ANOUC 1234567890 (c)(R)(TM) EUR GBP JPY <>&""

# PAGE 2 - FORM FIELDS

Existing AcroForm fields + blank labelled areas to add new ones

Full name (text field):

Email (text field):

Subscribe (checkbox):

Plan (radio group):                      Basic                      Pro

Country (dropdown):

Comments (multiline):

**BLANK AREAS - add NEW fields here:**

New single-line text:

New multiline text:

New dropdown:

New checkbox:

New radio:

New signature box:

Comb field (divide into 6):

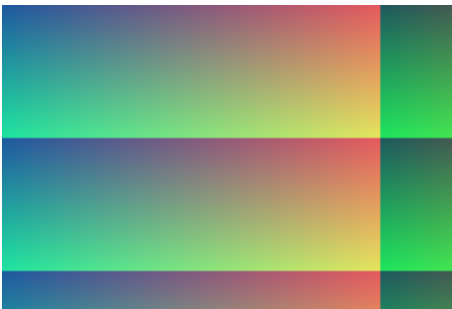

# PAGE 3 - LINKS, IMAGES, SHAPES

Existing hyperlinks + image + open space for shapes/whiteout

Existing external link: <https://example.com/existing-link>

Existing email link: <mailto:test@example.com>

Internal link -> jump to page 5

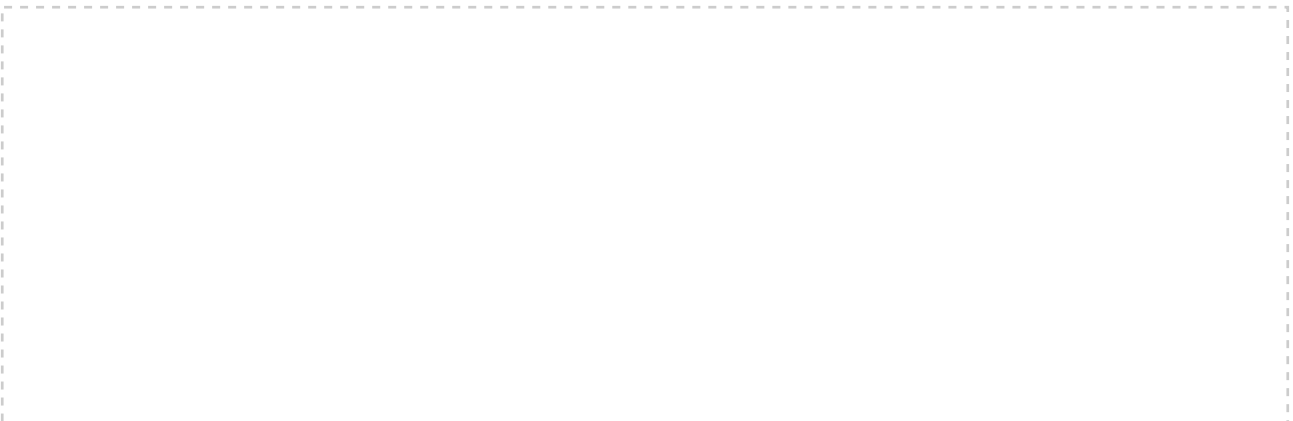

Embedded image - test "delete existing image"

Open area below for:

- Rectangle / Ellipse / Line / Arrow
- Whiteout rectangle
- Freehand draw + highlight
- New image placement
- Signature / stamp

FREE CANVAS AREA

# PAGE 4 - ANNOTATION TARGETS

Dense selectable text for highlight / strikeouts / underline

This paragraph exists so that text-selection annotations can be tested against a realistic block of prose. Select any portion of this sentence and apply a highlight, a strikeouts, or an underline. The run continues across several lines so that multi-line quad generation is exercised properly, including the case where a selection begins mid-line and ends mid-line on a later row. Annotation quads must be computed per line rather than as a single bounding box, otherwise the markup will cover whitespace that was never selected by the user.

Table (for extract-tables / whiteout tests):

| Item     | Qty | Unit  | Total  |
|----------|-----|-------|--------|
| Widget A | 12  | 4.50  | 54.00  |
| Widget B | 7   | 12.00 | 84.00  |
| Widget C | 3   | 29.99 | 89.97  |
|          |     | TOTAL | 227.97 |

# PAGE 6 - SIMULATED SCAN

Image-only page, no text layer - triggers scan detection / OCR path

---

INVOICE No. 2026-0042

Billed to: Acme Corporation

Date: 29 July 2026

This page is a raster image only.

There is no text layer, so text extraction returns nothing.

Editors should detect this and offer OCR

Amount due: 1,240.00
